**Pratap College University Amalner**  
**CGPA : 8.76 / 10**  
**2021-2024**

### SUMMARY

Back End Developer with experience in building APIs using FastAPI and Django. Skilled in Python, SQL, HTML, and CSS. Worked on an e-commerce project for Gnext, handling key modules like login, cart, and orders. Passionate about clean code and backend development.

### EXPERIENCE

#### JR.Back End Developer :

BeamInnovate Pvt. Ltd. | June 2025 – Present

- Developed REST APIs with FastAPI for Gnext's e-commerce platform (login, products, cart, orders).
- Implemented SQLAlchemy ORM, Pydantic & async features for performance and validation.
- Contributed to Uipltools.com by building the cashback module for buyback & cashback transactions (iPhones & laptops).
- Collaborated with frontend team using Git for version control.

### PROJECTS

#### SafeBank :

- **Description:** A Python-powered console application focused on secure and straightforward banking operations, allowing users to manage their accounts and transactions with ease in a command-line setting.

#### Recipe Sharing Platform:

- **Description:** Developed a simple recipe sharing platform using Django and MySQL, allowing users to share and browse recipes. Features include recipe submission with images, a search function, and a basic rating system. Designed a clean and responsive interface with HTML and CSS for easy navigation.
